

Name, Year, University, Field of study?

Mona MOINI, 6th year, Karolinska Institute, Medicine

2 - How often do you study (days per week)? For how long? In a group? Alone? If alone: Have you ever thought about/ tried working in a group? If no: Would you like to? Would it bother you? If in a group: With how many people? Often? Do you know these people? Would you like to work with people you don't know?

4 times a week. Each time 2-3 h. During my exams; every day 6-8h/day in 2-3 weeks.

I would rather study alone. Studying with my friends would distract me in many ways and stress me out.

3 - When was the last time you studied in a group? Where? Why? At what time?

Last year at school before my practical exams. Great time to get feedback from my classmates when we practiced together

4 - Have you ever had questions to which you couldn't find an answer? (From someone or on the internet)

Yes

5 - Have you ever worked with people you didn't know? Were there any problems? Would you have changed anything?

Yes

6 - Have you ever had trouble finding a place to study? A space other than a University Library / Library? Alone / In a group?

yeeess noises would always bother me while studying. Cozy cafes could be an alternative between 10-13 o'clock. Prefer alone.

7 - Difficulty in finding availability?

Yes

8 - Before / After the work session? (As a "reward" for work, after the effort, the comfort!)

--

9 - Do you take breaks during your work sessions? (For a coffee, a small snack, other...)

Yes in Swedish we call it "fika" aka coffee breaks 😊

10 - How would you like to study?

ALONE. introvert me says yes 😊

11- Has there been any situation in which you have preferred to study in gp rather than alone?

When I have practical or oral exams

12- Would studying in gps motivate you when you dont feel like studying?

I will join a group with the intention to study and then end up gossiping about everything with the group I have joined instead of studying. After all the gossips, Ill get the motivation but would rather go and study by myself
